Spida 5

Very user-friendly, advanced features

Spida 5 is a 32-bit PC based Spirometry software package, with a user-friendly, modern multi-window, visual interface and many new advanced features and improvements. Up to 41 spirometry parameters are measurable. Closed loop test technique and the overlaying of previous curves for comparison are now possible. Extensive search facilities and powerful comparative and long term trending of results are only some of the features.

Spida 5 (Cat. No SD5000) will connect with the SMS text entry keypad versions of MicroLab (ML3500), MicroLoop (ML3535), and the Gold Standard Transducer versions of MicroGP (MS07), MicroDL (MS08), MicroDiaryCard (MD02) and MicroPlus (MS03).

Spida 5 is compatible with Microsoft Windows 95, 98, 2000, Me, XP and NT, providing the system requirements are adhered to (see specification).

Spida 5 (SD5000)

- *Multi-window layout is extremely easy and fast to use*
- *Animated child incentive display*
- *Real-time Flow/Volume and Volume/Time traces*
- *Open and closed Flow/Volume loop test technique is possible*
- *Overlaying of previous test curves for comparison*
- *Long term trending facility*
- *Lung age calculation and textual interpretation*
- *Powerful search capability*
- *Up to 41 spirometry parameters are measured*
- *Can be easily linked to other patient journal or GP administration systems, occupational health systems or other medical databases*
- *Configurable printout format*
